AIT Company Statement – COVID-19

November 2020 Update

The Coronavirus Pandemic continues to evolve, causing challenges for companies in every industry.

AIT has continued to operate as normal throughout the crisis. Our Business Continuity Plan is working well and is enabling us to support our customers in a safe and compliant way. Throughout the Pandemic our managed services and support teams have continued to provide remote and onsite expertise to help our clients maintain the UKs critical infrastructure. They have done this equipped with effective PPE and additional training to minimise the risk of infection,

Our office is open and compliant with COVID 19 safe working best practice although the majority of our team members continue to work effectively from home.

We will continue to review our Business Continuity Plan and take all measures necessary to support our customers and meet their business objectives. We will remain vigilant and continue to monitor government and scientific advice and adapt our response as required.

Steve Bailey

Managing Director
